- **Social:** Human Behavior | FACS | Interpersonal Communication
- **Additional Knowledge:** Python | Golang | Node.js | Express | Docker

EDUCATION

Bachelor's Degree in Systems Analysis and Development

Senac, Caxias do Sul, RS. *Completed in 2022*

Technical Degree in Systems Analysis and Development

QI Escolas e Faculdades, Caxias do Sul, RS. *2015.*

EXTRA

I work as a technical-level instructor and a contract-based Virtual Reality (VR) developer.

I have maintained a public VR map used by the Brazilian community since 2020 ([link](#)).

Scout with multiple certifications in first aid, firefighting, survival, and military training.

PROFESSIONAL EXPERIENCE

Murbi Tecnologia, Fullstack Developer

May, 2024 – Apr, 2025

- Developed and maintained a charter tracking and management system, creating new features to improve usability and refactoring existing code to increase the platform's stability and scalability..

Akron Traceability, Fullstack Developer

Apr, 2023 – Apr, 2024

- Implemented decision-making logic in an automated inventory system, enabling product storage and retrieval without human intervention, significantly improving operational efficiency.
- Developed web integrations with SAP and WMS systems. Collaborated on product evolution, creatively identifying and solving problems to deliver efficient and long-lasting solutions.

Manp Tecnologia, Dev. Unity e Android S.

Oct, 2021 – Apr, 2023

- Managed an Augmented Reality project for the agricultural sector, using smartphone sensors and machinery data to guide precision procedures and improve user orientation.
- Developed features in Unity and Android Studio focused on integrated hardware and software solutions for agribusiness.

Manp Tecnologia, Android Studio Intern

Jun, 2021 – Oct, 2021

- Created a monitoring tool for agricultural planters, using machine sensors to display real-time planting statistics.
